

## 45,000 ALIEN-OWNED PATENTS FOR YOUR INSPECTION

The 45,000 alien-owned patents taken over by the Alien Property Custodian for the benefit of American Industry will be available for your examination on June 6, 7, 8, and 9 in Room 7052, 7th Floor, Plankinton Building, Milwaukee from 9:00 AM until 8:00 PM (5:00 PM on Friday).

Millions of man hours of research and development are represented in the seized patents which were registered in the U. S. Patent Office at considerable expense to protect their former holders in the American market. It is reasonable to assure that many of the best foreign patents are among those taken over--and that some of them might provide answers to some of your problems.

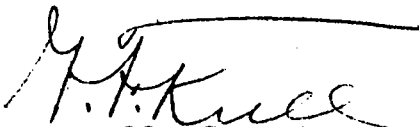

The exhibit is being co-sponsored by the Wisconsin Manufacturers' Association. Trained patent librarians from the Alien Property Custodian's Office will be on duty to help you find the patents covering the specific lines and items in which you are interested. It is believed that companies whose pre-war lines require broadening will find ideas, items or processes they can use advantageously and that new companies organized since the war began may find items they can manufacture and sell profitably when restrictions on civilian goods are relaxed.
